

Easy facial protection made of high-quality recycled PETG or Polycarbonate

- The antistatic coating ensures that the face shield does not fog up as much.
- Adjustable textile elastic band for continuous adjustment of the head circumference.
- An aseptic foam pad is attached to the forehead area for increased comfort.
- Resistant to solvent-based disinfectants.
- **Polycarbonate model is sterilizable with steam (autoclave).**
- Can be cleaned either under hot running water or with a microfibre cloth.
- Swiss product from Swiss production.
- **Note: This is not a tested medical product according to the Medical Devices Ordinance. Wearing it on your own responsibility**
